1 Debugger

To use the JS debugger in your browser, you can use the `debugger` statement in your code, but the browser must have the developer tools open.

2 BOM & DOM

2.1 BOM (Browser Object Model)

- `innerHeight`: height of the browser window
- `innerWidth`: width of the browser window
- `window.open()`: open a new window
- `window.close()`: close the current window

2.2 DOM (Document Object Model)

Suppose we have this HTML code:

```
<div id="div1">
  Lorem ipsum dolor sit amet consectetur adipisicing elit. Ex, iusto!
  <div id="par1">
    Lorem ipsum dolor sit amet consectetur adipisicing elit. Tempore, hic!
  </div>
</div>
```

To get the
