Session 1 (Linux Administration)

Mohamed Emary

January 12, 2025

1 Commands

See the help or man page of any command. For example: `uname --help`

- `uname` Command and its options
- `cal`
- `date` & `date +`
- `who`, `whoami`, `w`
- `pwd`
- `cd`
- `ls`
- `dir`
- `touch`
- `cat`
- `head`
- `tail`

`pts` VS `tty`

2 Window VS Windows Users

| Window	Linux
Administrator	root
Regular User	user

3   Linux File System

Figure 1: Linux File System

What does each dir in linux file system contain?
